Rise of each count per added error

	Missed	Switch	Fragm.	False pos.
Labels ending	0.97	0	0.99	0
Labels beginning	-0.03	0	0.99	1.00
Relabelled	0	-0.01	0.98	0.02
Two-way flags	-0.01	0.97	-0.01	0

1 Count the four signals in the movie.
2 Add a known number of each error type to the same movie and measure how much each count rises: the matrix above.
3 Solve counts = matrix × rates for rates ≥ 0.
